**Now Available: Sunrise Over the
Ocean!**

**What Came First, the Chicken or
the Egg?**

**100% Reclaimed Wood Potting
Tables 15% off for Christmas!!**

Calendar of Upcoming Events

Greetings!

My client sent me the picture above of the playhouse we built for her granddaughters. They decorated it for Christmas and asked their grandma to please send it to me. I am happy to share this picture with all of you this holiday season, it is so very festive and bright!

At *A Place to Grow* we have been keeping busy through this rainy fall and soon to be winter season by fitting in some smaller projects that have been really rewarding for us! We are still busy building outdoor structures for our clients, yet getting our creative juices flowing by building a reclaimed wood armoire, an lpe deck, potting tables and a chicken coop!!

We are eagerly anticipating the new year and all the exciting projects to come! Next up is a new home show booth that will feature a door that drops down to make a bar! This will showcase a new way to create the outdoor experience you are looking for. We love using our reclaimed materials as well as our client's unique materials in new and different ways.

At *A Place to Grow* we specialize in creating unique outdoor living spaces for you to grow, whether it's a greenhouse to grow plants, an artist studio/meditation retreat to grow spiritually or a hot tub enclosure to grow peace and tranquility. As soon as you are ready to start designing your own unique structure,

please respond to this email or call us at 805.704.1155.

You received this newsletter because you expressed an interest in *A Place to Grow* by signing up with us at one of our events or on our web page.

We look forward to talking with you soon!

Dana

December's Featured Structure

At *A Place to Grow* we pride ourselves on helping our clients create spaces that help them grow in whatever way they choose.

We recently had the honor of creating unique and artistic wall panels to fit between the posts of this existing pergola! Our client has been collecting windows and doors for years and wanting to do something artistic with them. We designed the walls using her windows and doors to create an outdoor space that will keep them warm and dry in the winter months and provide a shady, cool spot in the summer months. We sheeted the roof with old corrugated metal giving it a really rustic feel.

If you would like to schedule an appointment to talk about creating your very own *Place to Grow* please respond to this email or give us a call at 805.704.1155.

Ribbon Cutting Ceremony at Bellevue-Santa Fe School

Bellevue Santa Fe School hosted a ribbon cutting and dedication ceremony on Friday, December 12, 2014, for the greenhouse we donated to them. This donation was a collaboration with Pacific Lumber donating wood and Florcito Landscape Design donating the design services for the greenhouse.

At *A Place to Grow* we believe that children need the ability to get outside and learn how to grow plants for pleasure or for food. By donating the windows, doors and assorted other re-purposed materials, we were able to make a dream come true for Bellevue-Santa Fe School by having their own greenhouse.

"We have had two other hoop house greenhouses that have blown away in the wind," said principal Brian Getz. We are happy to say that their greenhouse withstood the recent high gusts of wind and the abundant rainfall

The next plan is for them to build some shelves and to get more seeds planted. They served a salad of fresh lettuce from their garden at the ribbon cutting ceremony. The children loved eating what they had grown.

Meet Our New Carpenter- Matthew Kemmish

Matt comes to us all the way from Seattle, Washington where he worked for 12 years as a finish carpenter with his dad. He has done extensive woodworking and is embracing working with reclaimed and re-purposed materials, such as the old door in this picture!

Matt's favorite hobby is cycling. He has 6 bikes and rides to work every day from Los Osos!! He also enjoys camping, hiking, snowboarding, tabletop gaming and racquetball to name a few favorite pastimes of his.

Matt moved to the Central Coast to start a new adventure and we are happy to welcome him to the *A Place to Grow* family! Feel free to stop by and meet Matt the next time you are in SLO.

What Came First, the Chicken or the Egg?

We recently built a chicken coop from reclaimed fence boards, corrugated metal and other scrap material from other projects. We are passionate about keeping construction waste materials out of the landfill by using them to create outdoor structures that are functional yet artistic!

This chicken coop is definitely "eggceptional" in that it functions as a coop yet has the artistic flair that makes it unique! What chicken wouldn't love to lay her eggs in there?

Come by our shop to see if this coop will work for you.

It can hold up to 6 chickens and is built to be modular and moveable. We are offering 15% off of chicken coops up until December 24, 2014, so don't miss out! What a great gift this would make as we are approaching the spring season for baby chicks!

100% Reclaimed Wood Potting Tables 15% off for Christmas!!

We are excited to offer unique potting tables in addition to our recycled structures!

This potting table is made of 100% reclaimed wood and has been re-purposed into a functional table that would complement any garden. This is a picture that one of our many happy clients sent us showing how she is using her table! We offer a delightful selection of these useful, yet artistic potting tables for sale at our shop located at 445 B Prado Road in San Luis Obispo. These tables come in 4' and 6' lengths and make great gifts!

We are also offering 15% off our garden arbors, which would be great for events or as an entrance to your garden! Come by and get some Christmas shopping done for your loved ones!

Calendar of Upcoming Events
