Greetings!

For those of you we met at the Morro Bay Art in the Park event, welcome to the *A Place to Grow* family! We thoroughly enjoyed visiting with all of you and look forward to connecting again in the near future.

We just set up our amazing "Sunrise Over the Ocean" show booth structure at the California Mid- State Fair in Paso Robles. It will be there for the next two weeks as part of the Landscape Competition, and is located across from the Grandstands. We are teamed up with Armet's Landscaping again, and if you saw it last year you may remember that our combined entry won First Place and Best in Show! Go and enjoy the Mid-State Fair and be sure to stop by our booth!

At *A Place to Grow* we specialize in creating unique outdoor living spaces for you to grow, whether it's a greenhouse to grow plants or an artist studio/meditation retreat to grow spiritually. As soon as you are ready to start designing your own unique structure, please respond to this email or call us at 805.704.1155.

You received this newsletter because you expressed an interest in *A Place to Grow* by signing up with us at one of our events or on our web page.

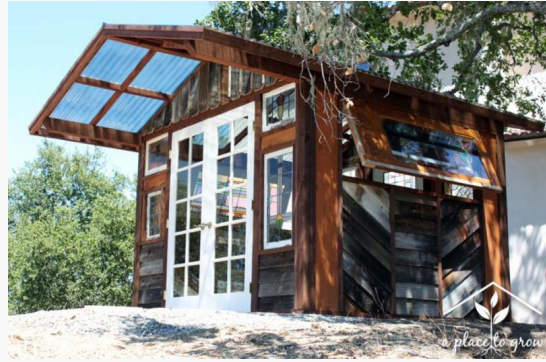

We look forward to talking with you soon!

Dana

## **Featured Structure**

At *A Place to Grow* we pride ourselves on helping our clients create spaces that help them grow in whatever way they choose.

We recently had the honor of creating this amazing sanctuary that is custom crafted using our client's own windows and doors. It is truly a work of art with the stained glass French doors re-purposed as windows on each of the side walls and various other stained glass windows. Each of the windows were different yet they all came together in such a beautifully blended way.

This structure features a covered porch off the back with french doors that look out over a valley filled with breathtakingly beautiful oak trees. We love using client's materials and bringing them together in unique ways to create artistic outdoor structures!

If you would like to schedule an appointment to talk about creating your very own *Place to Grow* please respond to this email or give us a call at 805.704.1155.

## The Story Behind "Wavy" Glass

We have many unique windows in stock, some of these windows have glass in them that is "wavy" and imperfect. This is what is called sheet glass, and it was made by drawing upwards from a pool of molten glass a thin sheet held at the edges by rollers. As the glass cooled the rising sheet stiffened and could then be cut. The two surfaces were of lower quality i.e. not as smooth or uniform as those of float glass. This process was used to mass-produce glass for windows until full scale profitable sales of float glass was first achieved in 1960. Float glass was been used ever since as it provides smooth, transparent glass without any distortion.

These older windows with sheet glass are now highly sought after, as they are both antique and interesting. When the sun shines through these windows it creates a soft, fuzzy light that is perfect for meditating or just plain old relaxing and daydreaming.

If you have a special window or door, whether it's stained glass or wavy glass, we would love to work with you to design it in to your own unique structure! At *A Place to Grow* we specialize in creating artistic outdoor spaces that are also functional.

Because each of our structures is custom created and a piece of art, they all come with a certificate of authenticity and the story of where the individual pieces came from. Our structures at *A Place to Grow* are works of art in every sense.

If you would like to come by our workshop to see some of these materials or schedule a design

consultation, please call 805.704.1155 for an appointment.

## Clients Love 100% Reclaimed Wood Potting Tables

We are excited to offer a few other garden products in addition to our recycled structures!

This potting table is made of 100% reclaimed wood and has been re-purposed into a functional table that would complement any garden. This is a picture that our happy client sent us showing how she is using her table! We offer a delightful selection of these useful, yet artistic potting tables for sale at our shop located at 445 B Prado Road in San Luis Obispo. These tables are so unique and make great gifts!

*A Place to Grow* is pleased to offer these beautiful concrete planters for sale. Each one is handcrafted by FLEX Concrete Studio and is truly a work of art!
