Greetings!

I recently had the pleasure of having the Advanced Placement Environmental Science classes from Mission College Prep come to my shop as part of their curriculum. It was great to share with these young adults how we are an environmentally friendly company doing our part to keep construction waste materials out of the landfill and to share their enthusiasm for all things green!

I also had the pleasure of working with [The Tribune](#) this month as they are featuring *A Place to Grow* in their Home Tour section tomorrow, February 25th. Three of our clients were interviewed and their outdoor spaces were photographed for the article. The picture above is the inside of a sewing room that our client has made absolutely beautiful. Be sure and pick up a paper or check it out online.

At *A Place to Grow* we specialize in creating unique outdoor living spaces for you to grow, whether it's a greenhouse to grow plants, an artist studio/meditation retreat to grow spiritually or a hot tub enclosure to grow peace and tranquility. As soon as you are ready to start designing your own unique structure, please respond to this email or call us at 805.704.1155.

You received this newsletter because you expressed an interest in *A Place to Grow* by signing up with

us at one of our events or on our web page.

We look forward to talking with you soon!

Dana

February's Featured Structure: Diamond in the Rough

At *A Place to Grow* we pride ourselves on creating sacred spaces that help our clients grow in whatever way they choose.

We recently created this unique and artistic outdoor dining room that features a vintage diamond pane window that has an extraordinary focal pane of "water" stained glass in the center, which immediately draws attention to the back wall.

We also incorporated a "Wine Bar" wall that features a drop down French door re-purposed as a bar top, French oak wine flavor sticks from the production

of wine in stainless and a half wine barrel were built into the wall. The opposite wall features a glass sliding door re-purposed as a picture window flanked by old "wormwood" that has chunks of colored glass embedded in it and is covered with a clear resin. Many thanks to our client, Ray, for the creative colored glass idea!

If you would like to schedule an appointment to talk about creating your very own *Place to Grow* please respond to this email or give us a call at 805.704.1155.

Choose Your Unique Materials

We have many unique materials in stock that we have sourced from all over San Luis Obispo County, as well as from other counties in California.

This beautiful circle-top sash window is extraordinary and would look amazing in one of our outdoor structures. These windows are rare and we are thrilled to have one currently in stock!

If you have a special window or door, whether it's stained glass or an antique, we would love to work with you to design it in to your own unique structure! This beautiful window is from an historical house in San Luis Obispo which dates back approximately 100 years! This is a truly one of a kind window and will be magical in one of our outdoor structures!

Because each of our structures is custom created and

a piece of art, they all come with a certificate of authenticity and the story of where the individual pieces came from. Our structures at *A Place to Grow* are works of art in every sense.

If you would like to come by our workshop to see some of these materials or schedule a design consultation, please call 805.704.1155 for an appointment.

10% Off the Extraordinary Sunrise Over the Ocean Structure!

Our beautiful Sunrise Over the Ocean Structure is now available for sale and we are giving 10% off in celebration of the coming of spring!

This outdoor structure features urban forested red wood, antique French style windows, Corten metal, redwood fence boards, French door re-purposed as a window and a back wall featuring an antique sunburst (Palladium) window with marine wood below it from a decommissioned bait barge off the coast of San Diego. We designed this structure to portray the sun (sunburst window) rising over the ocean (marine wood) with the white boards envisioned as the white caps on the

ocean. The rust in the metal elements was designed to bring out the rust in the marine wood. Some of the marine wood even has barnacles still on it. This stunning three-sided structure will become your favorite spot for entertaining, writing your memoirs or just relaxing at the end of the day.

At *A Place to Grow*, we believe in creating functionally artistic outdoor spaces for our clients.

If you have a special place in your yard for this unique structure, please give us a call at 805.704.1155 or email at Dana@RecycledGreenhouses.com

We Have Chicken Coops!

We recently built a chicken coop

from reclaimed fence boards, corrugated metal and other scrap material from other projects. We are passionate about keeping construction waste materials out of the landfill by using them to create outdoor structures that are functional yet artistic!

This chicken coop is definitely "eggceptional" in that it functions as a coop yet has the artistic flair that makes it unique! What chicken wouldn't love to lay her eggs in there? We also offer a chicken run that can be attached to the coop.

Come by our shop to see if this coop will work for you. It can hold up to 6 chickens and is built to be modular and moveable. The timing is great to start thinking about purchasing a coop for the spring season and baby chicks!

100% Reclaimed Wood Potting Tables

We are excited to offer unique potting tables in addition to our recycled structures!

This potting table is made of 100% reclaimed wood and has been re-purposed into a functional table that would complement any garden. This is a picture that one of our many happy clients sent us showing how she is using her table! We offer a delightful selection of these useful, yet artistic potting tables for sale at our shop located at 445 B Prado Road in San Luis Obispo. These tables come in 4' and 6' lengths and make great gifts!

We also have garden arbors, which would be great for events or as an entrance to your garden! Come by and see what we have available. We will also have our smaller garden products, including potting tables, arbors and chicken coops at Farm Supply in San Luis Obispo and Arroyo Grande starting February 2015!

Calendar of Upcoming Events

Upcoming in 2015

February
